### An Improved Method of Poisoning Gophers

By Professor R. A. Cooley of The Montana State College

One of the problems with which the prairie farmer is faced in the spring is that of reducing the number of gophers that have hibernated and arisen from their holes. Of the several methods, such as poisoning, fumigating, and trapping, which have been utilized from time to time for this purpose, it would appear that poisoning is the best adapted to the use of the average farmer.

Wheat poisoned with strichine sulphate has been used for many years for gopher control but, despite excellent results obtained with this, it has certain disadvantages. With the appearance of green growth in the spring the dry grain becomes poisonless when there are no longer attractions to the gophers. This bait therefore, is of value only while it is in the season.

In addition to this, the wheat has been poisoned for gopher destruction, is frequently eaten by the all too scarce prairie Birds, such as Horned and Meadow Larks. Poisoning these Birds is of Serious Consequence, since each of them is probably as Great a Friend of the farmer as the Gopher is his Enemy. They do Destroy immense numbers of Noxious Insects, such as Cutworms and Grasshoppers.

In order to Protect these Birds from being killed by eating on the poisoned wheat the latter is often placed in the gopher burrows instead of being scattered near the entrance to the hole. Unfortunately, the gopher does not feed on this grain while it is in the hole. Every day, however, he "cleans house" by kicking out any loose earth, or other material, that he finds in the burrow. In this way he scatters around the entrance all of the poisoned grain which may have been placed well into the hole, should he chance to find any of these scattered grains he may feed on them and be poisoned. The gopher has placed them within reach of the Birds which the farmer sought to protect.

Both of these disadvantages can be overcome if Oats are used to replace wheat as the carrier of the poison.

Gophers will feed on poisoned Oats throughout the summer when they cannot be tempted with wheat. Of still greater importance is the fact that no small Birds will eat, at any time, on these Oats. Large birds such as prairie chicken, partridge and pouterie, it is true, feed freely on them, but none of these are susceptible to poisoning by strichine. The fact is not generally known in Alberta, but it has been amply demonstrated both here and elsewhere by feeding domestic poultry for over two weeks on poisoned grain. Gophers fed on grain from the same stock were killed in about 24 hours.

For this reason Poisoned Oats are Not Dangerous to any Bird-life with the exception of crows and magpies, which may be killed by feeding on poisoned gophers.

A teaspoonful of Poisoned Oats, if a little scattered, is not dangerous to stock who placed near the entrance to a gopher burrow, but it is almost certain to be found and eaten by the gopher at any season of the year that it is above ground.

In the States of Montana and Dakota, where state wide gopher control is compulsory, Poisons that are used to the exclusion of any other method of control, and in these States the Gophers have been nearly exterminated. It has been found that "strichine alkalized" is far superior to strichine sulphate" for poisoning grain, and the

following Directions for Poisoning Oats with this substance are given by Professor R.A. Cooley of the Montana State College:

1. Mix one ounce of strichine alkalized, powdered, and one ounce of baking soda (1 tablespoonful) together in a dry form.

2. Prepare starch paste as follows: Dissolve one heaping tablespoonful of dry starch in a little cold water, when dissolved dissolve add enough water to make the mixture of a pint. Boil and stir constantly until a clear this paste is formed.

3. Now stir the mixture of strichine and baking soda into the starch while the latter is still hot, stir thoroughly until a creamy mass is formed.

4. Add one-fourth pint of any ordinary syrup, such as crown syrup and stir thoroughly.

5. Add one-eighth of an ounce (1 teaspoonful) of saccharin and one-eighth of an ounce (1 tablespoonful) of glycerine and again stir thoroughly.

6. Pour this mixture over twenty quarts of good clean oats and stir until every kernel is covered with a thin coat of poisoned starch paste. This can be done in an ordinary wash tub. A quart of Oats contains 120 teaspoonsful or enough for that number of burrows.

It will be seen that this formula calls for considerably more work than does the usual preparation with strichine sulphate, but if any Municipal Council or Farmer's Organization is contemplating an extensive campaign this spring we would strongly recommend that it be employed in order that the bait may be used throughout the summer, and that Valuable Birds will not be Killed.

This has been going on now ever since two years ago, so surely it is time something was done.

Why couldn't these Chinese be moved to the outskirts of the Town on the East side where there is a decided slope for miles away, so that this dirty Washing water would be no Menace to the Public Health, for this Chinese Laundry to remain where it is must be a Menace to the Health of everybody.

And the Summer time is coming on.

We have been informed that these Chinese have Orders to do certain things to remedy these conditions and we are wondering if they will comply with those Orders

### Bow Island News

Mr. Phelps one of the Inspectors of the Health Department at Edmonton while on a visit of Inspection here last Saturday the 6th, and again on the 8th and 10th, May, also Inspected the Unsanitary Conditions of the Chinese Laundry which is right on the Main Street of Bow Island and next to the G.W.V.A. Club Room and near the Review Office, he saw holes dug in the backyard full of putrid water filled with dredged Disease Germs, and the stench of this water is beyond description.

This foul water, the result of Wash-

ing Clothes, passes down a pipe, from

a sink where these Chinese wash the clothes into roughly dug holes in

the backyard and the water is then left to rot and be a Menace to Health to the whole neighbourhood.

Holes are hidden, from

Sight of anyone passing by and

Everything looks like an Imperial Palace, because these holes are covered over with Boards, that makes it look like

a floor for the Chinese to walk on

when they are hanging out the Wash-

ing—but let all those Boards be taken up—and Not many people want to stay very long.

This has been going on now ever

since two years ago, so surely it is time

something was done.

Why couldn't these Chinese be moved to the outskirts of the Town on the East side where there is a decided slope for miles away, so that this dirty

Washing water would be no Menace

to the Public Health, for this Chinese Laundry to remain where it is must be a Menace to the Health of everybody.

And the Summer time is coming on.

We have been informed that these Chinese have Orders to do certain things to remedy these conditions and we are wondering if they will comply with those Orders

### Police Court News

Re Karl F. Karson, contrary to

Health Act.

Mr. Phelps, an Inspector of Health Dept., Edmonton laid an information before Robt. H. Robertson, J.P., charge that K.F. Karson at Bow Island on or about the 6th, day of May 1922, did maintain a nuisance, to wit, having his premises in a unclean state contrary to Sec. 122, Chap. 17 of the Provincial Health Act statutes of Alberta 1910 and amendments thereto.

Constable Bradner served summons on the accused in this case, the accused appeared at 7:30 p.m. before R. H. Robertson, J.P., the accused pleaded guilty and was fined \$2.00. Mr. Phelps, sworn, said I am an Inspector of the Health Department, he said that he inspected the premises of the accused last Saturday afternoon and found the stable both inside and outside in a very unsanitary condition, there was also a pig house at the north end of the stable in the same condition.

The inspector could not locate a milk house, but found milk stools in the dwelling house, the inspector did not examine them as the whole premises were far from being in the condition they should be for a person who is a vendor of milk.

Dr. L.L. Cairns M.D. sworn, said he is the Medical Health Officer for Bow Island and District, and that he went with Mr. Phelps that afternoon and examined the premises of the accused and found them in a very unsanitary condition for a person handling milk for the public.

The accused had no question to ask and as this was his first offense he was given an order from the Justice to whitewash the stable and to take all refuse and manure away and clean those premises within seven days.

The accused was fined \$2.00 and costs or in default of payment 30 days hard labour in the Lethbridge jail, the fine and costs were paid.

Re Karl F. Karson contra of Health Act.

Mr. E. Phelps Inspector of Health Department, Edmonton on May 8th, inst. laid an information before Mr. R.H. Robertson, J.P., charge that K.F. Karson at Bow Island on or about the 6th, day of May 1922, did keep his premises in a unclean state contrary to Sec. 122, Chap. 17 of the Provincial Health Act of Alberta 1910 and amendments thereto.

The accused appeared before R.H. Robertson J.P. on May 10th, and was charged with the offense of keeping his premises in an unclean state contrary to Sec. 122, Chap. 17 of the Provincial Health Act of Alberta 1910 and amendments thereto.

Constable Bradner served summons on the accused and the accused pleaded guilty, his worship ordered him to remove the hog's head to the Town limit and to whitewash the stable and to take all refuse and manure away and clean those premises within seven days.

The accused was fined \$2.00 and costs or in default of payment 30 days hard labour in the Lethbridge jail, the fine and costs were paid.

### A WARNING

It has come to my knowledge that a statement was made at a social gathering at the residence of one of our leading citizens on Tuesday by a person (the name is known) of a Slanderous Nature and with Malicious Intent, regarding my cattle, which statement to the best of my knowledge and belief is entirely without foundation in fact, and if I hear of this statement being repeated by the same person or by any person having heard it, I shall institute legal proceedings against such person or persons without further warning.

Good -

of Canada's success in the re-settlement of ex-soldiers had far and wide, some-  
times the chagrin of other na-  
tions who had failed to make good  
on their promises to all the cause of  
re-training, free of charge, in  
land or otherwise, the  
one choice in which their disabilities  
would not prove a handicap.  
The scheme has been well  
planned through the land settle-  
ment scheme.

Up to the end of October,  
1921, show that 27,142 returned sol-  
diers have been settled on 1,000,000  
acres of land, mostly on 160-acre  
plots in the civil life at the close of  
the Canadian govern-  
ment's war. The amount spent  
was more than \$300,000,000.  
It was to let each re-  
turning soldier be able to step into his  
former position. For those  
who did not become farmers, assist-  
ance was given to help them find  
employment work was given  
through employment bureaus. Dis-  
abled men whose disabilities pre-  
cluded them from fitting in  
with the community were given  
the opportunity of being em-  
ployed in the service of the government  
or in the private sector of the economy.

With the exception of the  
settlers in the prairie provinces, the  
settlers in the eastern provinces  
have been given the opportunity  
of re-training, free of charge, in  
land or otherwise, the  
one choice in which their disabilities  
would not prove a handicap.  
The scheme has been well  
planned through the land settle-  
ment scheme.

## Cure For Hard Times

Business conditions in Canada are not good at the present time, and while our condition is probably no better than most countries, that is itself a poor consolation. Instead of endeavoring to find excuses for present conditions, the chief business of every individual citizen should be to find a remedy and effect an improvement. And the hopeful feature of the situation is that improvement is not contingent on what Governments, Banks and big financial and industrial corporations may, or may not, do. Betterments will be the result of actions of individuals.

It is the opinion of the reviewer a short time ago that hard times had come. This is challenged by one of the most widely travelling and best informed men in Western Canada who says that the person making such a remark is in error, and that he should have said "soft times have gone." We are not so sure that even this is the correct way of putting it. Rather we would say that too many people are acting on the assumption that soft times have come.

There is only one remedy for the existing economic ills from which all are suffering, and that is work. Not work by a few, but work by all. Not a minimum of work, but the full maximum of work of which one is capable. Not work that is advanced over the sixteen hour day, five days a week, but rather work that is undertaken on a bi-weekly injection five days a week.

A financial man who recently made an extended trip throughout Western Canada studying conditions, states that wherever he went he heard such questions as: "What are the banks going to do?" "What are the manufacturers doing?" "What is the government doing?" "What are the politicians doing?" and so on. In short, there is a loss of confidence in business, and that is a bad thing.

Commenting on the situation as this man found it, a writer in one of the financial journals says: "It has given me the power to look outside and outside of today is 'business' and yet I am wondering what is the matter with business." We are all waiting for the other to start something, and feel deeply offended when he signals us to make the first move. The world has grown so used to play that it cannot settle down to work. The boys are talking and thinking golf. In a few weeks he will be playing golf, and his thoughts are still on the game.

The boy is a good sport, but he is not a good business man. The boy is the best part of her short working day planning what she will do after the next dance.

The office boy is wondering how many grandmothers he will be able to safely bury during the baseball season. It is the aftermath of the horse taking up golf, under the excuse that he is keeping himself fit to play golf.

"There's nothing wrong with business that I can see," said this observant traveler, "but there is a whole lot wrong with business men. Too many people are drawing their pay and their breath, and that is about all they do—draw—they are trying to look prosperous even if they don't feel prosperous." They are wondering, and waiting, for others to get busy while idling themselves.

It is well to remember, declares the trade journal from which we have already quoted, that success comes in cans and failures in cans. There is only one letter between the two, but it makes all the difference in the world as far as results are concerned, and it is results that count.

The remedy for present times, or soft times, is to get away from present day delusions and get back to the good old Biblical methods, namely, hard work, bending the back, above ground and below ground, coupled with the average amount of brain and general thrift, things will soon right themselves.

The great present-day need is confidence coupled with energy and a will to do. Confidence in our country and in our country's institutions, but also confidence in ourselves. That is the real blameworthy all our misfortunes and troubles on the war, and after-war effects. Millions of men and women during the war learned to look to Governments and semi-government institutions for clothing, food, and the wherewithal to live. This was inevitable, and we were taken from the more or less voluntary associations for military service. But this time along come arrived who are more or less learning on such superior, and must exert themselves and provide for themselves. Instead of relying on others to do for them, they must do for themselves. In a word, they must develop their old self-confidence and set to work for themselves.

Until all individuals realize these things, and until they learn that a continuance of so-called soft times, that is really means and brings about hard times, the country will wallow in the slough of business depression and unemployment.

## New Primer for Western Schools

Has Been Prepared by Edmonton Workers Teachers.

The children in the primary grades of the public schools are to have a new reading book and a committee of provincial primary experts met at the Department of Education in Edmonton with John M. Burnet, Minister of Education, acting as host, the following representatives of the four western provinces were present:

Miss A. Gertrude Jackson, Calgary.

for Alberta; Miss E. E. Rankin, Saskatchewan; Miss Anne W. Whiting, Victoria, British Columbia. These form a standing committee appointed once a year to deal with the matter.

A new primer has already been prepared and was before the committee for examination. It is the work of Miss E. M. Burnett, of the Edmonton Normal School, who bases her examination for the primary grades according to modern ideas of what little reading books for little readers should be.

## Educational Films

Over 1,000,000 educational films have been viewed the twelve educational film studios distributed by the Provincial Government during 1921. These films which are issued free of charge, cover a wide variety of subjects, such as agriculture, better home building, early farm boys' camp, house hold science, selecting livestock, etc.

## Ontario Mining Production

It is estimated that in the decade's history of mining in Ontario, Ontario, the various mines have contributed more than \$75,000,000 to the wealth of Ontario.

Marie Elliott is now the only acress whose name is borne by any New York theatre.

Keep your store of salves, and your kindest thought, for home; give your world only those you have to spare.

Minard's Liniment for Burns, etc.

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instant relief. If you drop it on a splinter, if you lift it right off with fingers. Truly!

The druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corns under the toes and the calluses, without soreness or irritation.

## A Shark Tannery

Will Tan Hides of Market Plant on Vancouver Island.

It is planned to start a shark tannery on the west coast of Vancouver Island. The plant will be on a large scale, two boats being engaged in the catching of sharks. The skins are suited to the manufacture of leather of superior quality, for use in gloves, bags, purses and shoes. A very fine oil is extracted and used for medicine and for lubricating purposes. The fish are used in making fertilizer. There are many sharks on the west coast, and the industry should become a lucrative one.

## DIGESTIVE TROUBLES CAUSE MUCH DISTRESS

Are Never Always Due to Thin Water

One is easily upset because your stomach is easily upset by you. The victim of some serious malady. One cause of digestive trouble is constipation. The stomach is impossible unless the bowel is rich and red.

The following remedies have been found valuable in cases of indigestion, nervous dyspepsia and stomach water. They are: a glass of milk, a blood builder and nerve tonic. The tea is a stimulant to the bowels and imparts a healthy glow to the skin. It carries color to the cheeks and lips. One important point to remember is that it is the muscles that Dr. Williams' Pink Pills contain no taste, odor or opinion. One is thus to be preferred to a prescription that merely stimulates for a time. He says that in America there is no such safe condition than better in Canada than in the U.S. at present.

One large firm which uses newspapers almost exclusively in both countries, and a number of smaller ones, are on both sides of the border, and keeping close check on results, reports that during the past year sales declined 14 per cent. in the United States as compared with only 6 per cent. in Canada.

Another firm, manufacturing a widely-known toilet specialty, although not divulging actual figures, is not less thoroughly convinced of the superiority of conditions in Canada at present.

The concern also takes scrupulous attention to results, and it is as a direct outcome of their recent experience that they have recently commenced a very extensive campaign in Canada to bring the story of their products in newspapers and magazines.

Mr. Beveman reports that both agencies and advertisers in the United States are devoting a great deal more attention to Canada than has been the case for many years.

## Interesting Export Order

One of the most interesting export orders received by Canadian manufacturers was recently booked by Captain Frères, Limitée, of St. Hyacinthe, Quebec. It was for an organ to be installed in Paris, France, next September, and in view of the fact that it is the first instrument of the kind to be shipped from this continent to Europe. The organ has three manuals, 40 stops and over 3,000 pipes.

## Rubber Pavements

There may be an expert member of Copenhagen as a street pavements of rubber foot a distance of 200 miles, and it is to last for fifty years. The notorious pavement of the court to the Savoy Hotel in London is of rubber, and has been admired by tourists from all over the world. It is a form of pavement that has been developed especially for general use.

## Twan Bad for Business

A grocer is selling the Twan, Oklahoma, Daily Phoenix for damages, and he claims to have suffered through the paper carelessly accidentally destroying his advertisement. He claims that the loss of business was serious, although only one insertion was omitted.

## Girls attending the San Francisco high school of commerce have placed a sign on hall sticks holder.

## Britain Pays Again

## U.S. Receives Second Installment for Silver Bought During War

Payment of \$19,612,500 by Great Britain as the second installment on the silver loan made by the U.S. Government's purchase of silver during the war has been reported by the Treasury of the Federal Reserve Bank of New York.

The payment consisted of \$18,500,000 of principal and \$1,372,500 of interest. A further installment of \$12,000,000 in the debt is due May 15, which will cut Great Britain's debts from the United States from \$40,000,000 to \$10,000,000.

Under an arrangement for payment by Great Britain on the silver purchases, the debt will be liquidated in May, 1924, these payments being entirely apart from the \$5,000,000,000 of war loans due the United States from Great Britain.

**Chinese Guarded Silk Secret**

For centuries after its first discovery, the secret of the art of preserving the secret of silk culture and raised great wealth by exporting it to India, Persia and Arabia.

England has a mill-girl association in the person of Miss Mary Anne Dews, a clotheshorse in the town of Dewsbury, and who has recently been appointed a Justice of the peace.

## A Wide-Spread War Memorial

In memory of the war-time efforts for King and Country, of eleven thousand C.P.R. employees and more particularly of 1,115 men who gave their lives for the cause for which the British people stood, the Canadian Pacific Railway has erected at Montreal, Winnipeg, and Vancouver a striking bronze memorial group, depicting the three continents of Europe, Asia and America, with the Canadian Pacific Railway system between them. These statues were simultaneously unveiled on Friday, April 25th, His Excellency Lord Byng, the Governor General, officiating at the Montreal celebration.

A bronze tablet illustrated above, exact duplicates of this tablet were also unveiled at all important points on the C. P. R. system between the Atlantic and the Pacific, as well as at Americas, Europe and Asia. The tablets are about one foot in width, and were designed by Mr. Ernest G. O. P. B. Clark, Engineer in Chief, Montreal. They are about the left monument of R. M. S. "Lion," Admiral Beatty's Flagship at the battle of Jutland, and that on right the Canadian Pacific Steamship "Empress of Canada" engaged throughout the war in fast crossing of the Atlantic as a transatlantic liner, having a standard C. P. R. locomotive and train engine just brought in battalions to embark for overseas service. The soldiers in the centre represent all arms of the service. The base of the tablet is inscribed:

"Estimates of C.P.R. employees totalled 11,340 men, of which 1,115 were killed or died of wounds, and 2,100 were wounded. A total of 7,575 were re-embarked by the company on their return to Canada, following up the C.P.R. system, and 3,765 were sent to England, while 1,665 were sent to France, 1,000 to Italy, 1,000 to Russia, 1,000 to Australia, and a total of 18,112 other returned soldiers have also been taken on the company's service. War decorations and medals won by C.P.R. employees totalled 375, and include the following:—

1 Victoria Cross; 2 Order of the British Empire; 10 Distinguished Service Orders; 17 Distinguished Service Crosses; 2 Military Crosses; 24 Distinguished Conduct Medals; 47 Military Medals; 180

## Burdett News

From our own Correspondent

Mr. and Mrs. G. A. Pool were called to Lethbridge by the illness and death of their daughter-in-law Mrs. H. Pool.

The death of Mrs. Raymond Pool of Stirling, Alta., caused a stir of excitement and sympathy throughout this community. Mrs. Pool, who had spent a great part of her girlhood here as Miss Ethel Manning, was greatly beloved by all who knew her, for her lovable character and quiet ladylike manners. She spent her last days as a patient in the Van Harren Hospital in Lethbridge where she gave birth to a baby girl for whom she gave her life, leaving the little one to comfort those who left to comfort her. The funeral was arranged at Burdett for interment. The funeral services were held in the Methodist Church, of which she was a member, at 2 in the afternoon, the church was filled to its capacity with sympathetic friends. The Rev. Mr. Johnston preached an eloquent sermon, taking his text from 1 Peter 5: 10, speaking many words of comfort. The choir rendered the hymns, that were chosen by the family as favourites of the deceased, in a very feeling manner.

The bearers were Messrs. Alex Hamilton, A.W. Owen, R.E. Campbell, Bert Campbell, Don Colman, C.W. Hendershot. The number of flowers and floral pieces that covered the casket spoke of the high esteem in which the deceased was held. Those who attended from a distance were her husband, Mr. R. Pool, her mother and father Mr. and Mrs. E.E. Manning of Stirling, her sister and husband, Mr. and Mrs. F. Bond, Mr. Robertson from Bow Island and D.A. Colman of Hillcrest.

Mr. J. H. Hughes and Mr. S.G. Jamieson of Medicine Hat, have bought the bankrupt stock of Mr. K. Brown, and will remove all L.H.C. repays to Medicine Hat where Mr. Jamieson is agent for that firm, and the rest of the stock will be put on sale, the announcement of which will be found in another part of this paper.

Mrs. J.E. Campbell who has been with Mrs. Manning in Lethbridge during the illness of her daughter Mrs. Pool, has returned home.

Rev. and Mrs. Percy Johnson and Miss Spokane motored to Medicine Hat last Monday.

On account of the wintry weather there was not much wheat put in the ground last week but this week the farmers are making up for lost time, and are feeling very optimistic over the prospects, the only drawback at present is the shortage of feed for the horses.

Mrs. W. J. Stewart of Rockford, Illinois is visiting her daughter Mrs. A. Faust and intends spending the summer here with her daughter and other Rockford friends.

Nurse Hendryette and Mrs. G. A. Pool went to Lethbridge on Tuesday to bring back her infant grand-daughter, Mrs. Pool will keep the child and care for it for the present.
